

Our custom orthotics are designed based on an in-depth analysis of your biomechanics. Our highly trained Physical Therapists, who specialize in the foot/ankle and biomechanics, will develop the best custom orthotic solution for your active lifestyle. We even offer same day custom orthotics in order to get you back on your feet.

Customs orthotics fabricated using CAD/CAM computer software.

## Orthotics for your active lifestyle

Whether you're a runner, walker, cyclist, tri-athlete, skier, or a hiker, our custom orthotics can improve your performance and help eliminate your pain. Our staff specializes in evaluating and correcting the poor mechanics that are holding you back.

We will take an orthopedic history prior to evaluating your biomechanics. Your entire lower extremity biomechanics will be assessed both statically and dynamically. It is our goal to best correct not only your foot/ankle, but your knee, hip and pelvis mechanics as well.

We work with your physician, as needed, for the BEST results.

To set-up a Biomechanical Evaluation and Orthotic Fabrication / Solution

Call us @ 303-413-9903 to schedule an appointment!!!

Our orthotics cost between \$185-\$285 depending on your needs. This includes the cost of the:
